INTRODUCTION

The financial and operating data shown in this volume are compiled principally from annual reports filed with the Federal Communications Commission for the year 1947. Section A contains data from the reports of telephone, wire-telegraph, ocean-cable and radiotelegraph carriers, including reports from companies controlling those carriers. Section B pertains to data compiled from the annual reports from standard broadcast stations and networks.

This publication has been issued for nine consecutive years, beginning with the year 1939. Prior to that date, some of the tables were included in the Commission's Annual Reports to Congress, and some were issued in mimeographed form.

Additional explanatory remarks relating to the coverage of the statistics are contained in the statements introducing Sections A and B.

SECTION A

Financial and Operating Data Relative to Telephone, Wire-Telegraph, Ocean-Cable, and Radiotelegraph Carriers and Controlling Companies

COMMON CARRIERS AND CONTROLLING COMPANIES

General remarks.--Under the provisions of the Communications Act of 1934, as amended, only those communication carriers engaged in interstate, or foreign, communication service are subject to the full jurisdiction of the Commission, and are required to file annual and monthly reports. Practically all wire-telegraph, ocean-cable and radiotelegraph carriers are subject to the full jurisdiction of the Commission. There is a large number of telephone carriers, mostly rural lines, engaged in intrastate service that are not fully subject to the Act, and are not required to file reports. Some of the larger intrastate telephone carriers, however, file annual reports, and a considerable number file monthly reports for statistical purposes. The gross operating revenues of the carriers reporting annually cover approximately 95% of the revenues of all telephone carriers in the United States.

Annual reports from common carriers.—Items of principal interest in the annual reports are shown in this publication in summary form, and by individual companies. Statistical data are shown in detail for telephone carriers having average annual operating revenues exceeding $100,000, and for wire-telegraph, ocean-cable and radiotelegraph carriers having average annual operating revenues exceeding $50,000. Since the major portion of telephone business is handled by the Bell System, data are shown separately for that group. The elimination of certain intercompany duplications of financial and operating data is also shown for all large telephone carriers filing annual reports with the Commission considered as one system. Only a limited amount of data are shown for the smaller carriers, inasmuch as they file less comprehensive reports.

Monthly reports from common carriers.--This volume contains tables compiled from the monthly reports of common carriers. The reports on a monthly basis are required from telephone carriers having annual operating revenues exceeding $250,000, and from wire-telegraph, ocean-cable and radiotelegraph carriers having annual operating revenues exceeding $50,000. The cumulative monthly figures for telephone carriers are slightly larger than the figures shown for carriers which file annual reports, owing to the fact that numerous intrastate carriers file on a monthly but not on an annual basis.

Reports from controlling companies.—Financial data relating to individual companies controlling common carriers reporting to the Commission are shown in this publication, also a table showing the intercorporate relations between the carriers offering communication service, and the controlling companies. The holding companies which file annual reports are classified into the following groups: (a) Companies whose interest in common carriers constitutes a major portion of their assets, and (b) Companies whose interest in common carriers constitutes only a nominal portion of their assets.

Source: Annual reports filed with the Interstate Commerce Commission through 1933 and with the Federal Communications Commission beginning with 1934. In a few instances data from unofficial sources or estimates were used.

Note.--The difference in the number of carriers reporting to the Commission in 1947 in comparison with prior years is caused by mergers, consolidations, reclassifications, etc.

Data for 1926-1943 include information for carriers reporting as class A in 1943. These data also cover properties acquired previous to 1943 by such carriers, insofar as data concerning such properties are available from annual reports. Carriers which reported as class A carriers for the years 1944-1947 but not in 1943 are reflected in the data for 1944-1947 only. Neither information for these companies nor for properties acquired by them previous to 1944 are included in the data for the years 1926-1943.

The effect of this change of definition is extremely slight. For example, operating revenues of class A carriers reporting in 1947 not so characterized in 1943 had operating revenues which were only 0.023 percent of total operating revenues reported.

1/ For amounts reflecting eliminations of intercompany duplications see table B.

2/ In comparing data in this table, consideration may be given to the minor effect of the revisions of the Uniform System of Accounts, effective January 1, 1933 and January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statement.

3/ The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on only the respondent's portion of jointly owned wire was included.

4/ Partly estimated.

5/ Data shown for years 1926-1932 include estimates.

6/ Represents total compensation for the year divided by the number of employees.

7/ Represents the number of employees at end of October.

8/ Profits or losses on intercompany transfers of plant have not been eliminated.

Note.-- The number of telephones shown represent business and residence telephones in the Exchange or Zone Area of 225 cities in the United States, 3 cities in Puerto Rico, and 1 in Hawaii, each of which had an estimated population of 50,000 or more within its Corporate Limits on January 1, 1948. Fourteen of the cities shown are located within the exchange or zone areas of larger cities and for that reason the number of telephones of these cities are included in the number shown for the larger cities.

Note: - Gross operating revenues and expenses are used in computing averages. They have been computed on the basis of 325 days to the year, which is the basis used by the Bureau of the Census in similar computations.

1/ Excludes figures for American Telephone & Telegraph Co. inasmuch as its operations are not confined to one geographical region, but are included in totals for the United States.

2/ American Telephone & Telegraph Co. handles long line service only; has no exchange central offices.

Source: Based on monthly reports of carriers to Interstate Commerce Commission and Federal Communications Commission. The centered 12 - month moving average was calculated monthly from July 1929 through September 1946, and the ratios of the toll service revenues to the moving average were calculated. The ratios for a given month in all years were graduated by means of a linear relation with time. Certain specific months were omitted in determining the relations because of unusual historic events, e.g. October 1929 (market crash), September 1939 (invasion of Poland), and the like. The seasonal factors applied are the graduated values. The monthly revenues were seasonally adjusted by dividing them by these seasonal factors.

1/ The intercompany duplications with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported aggregate par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of the combined surplus accounts of the carriers.

2/ "Bell System" represents the American Telephone & Telegraph Co. and all operating telephone companies having assets in excess of $1,000,000 in which the American Company owns, directly or indirectly, securities representing more than 50% of the voting power.

3/ Intercompany eliminations applicable to specific accounts not ascertainable from reports.

4/ To apply all rent revenues, approximately two-thirds of which are intercompany, against rent expenses, to show net rent expenses in first two columns of figures.

5/ Averages for all companies combined not computed.

6/ Partly estimated.

Source: Annual reports and correspondence.

( ) Deficit or other reverse item.

1/ Includes carriers consolidated or merged for which annual report data are available. Intercompany duplications have not been excluded.

2/ Reflects transfer of $38,000,000 to depreciation reserve from surplus by Western Union Telegraph Co.

3/ In comparing data in this table with returns for prior years, consideration should be given to changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1943.

4/ Includes net book cost of plant of Postal Telegraph, Inc. acquired by the Western Union Telegraph Co. in the amount of $16,754,143 on basis of gross book cost of $69,320,179 less tentative allowances for depreciation of $52,566,036.

5/ Not comparable with amounts reported for December 31, 1943 because of accounting adjustments for Postal Telegraph plant purchased by the Western Union Telegraph Co. October 7, 1943; comparable 1943 amounts are $477,431,438 and $221,701,458, for plant and depreciation allowance, respectively.

6/ Includes other long-term debt.

7/ Includes capital surplus.

8/ Represents operating income before deduction of income taxes.

9/ Includes $3,535,926 charged to capital surplus.

10/ Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual count for test periods.

11/ Data shown for years 1926 to 1933, inclusive, include estimates by reporting carriers. The average shown represents total compensation for the year divided by the number of employees.

12/ Represents the number of employees at end of October.

Source: Annual reports, correspondence, and other reports. Intercompany duplications, if any, have not been excluded.

( ) Deficit or other reverse item.
1/ Data not available.
2/ In comparing data in this table, consideration should be given to the effect of changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1940.
3/ Includes other long-term debt beginning with the year 1940.
4/ Includes capital stock subscribed--unissued, amounting to $282,500 and $182,500 for the years 1946 and 1947, respectively.
5/ Includes capital surplus beginning with the year 1940.
6/ The increase was due principally to adjustments made by Mackay Radio and Telegraph Co. (California) and Mackay Radio and Telegraph Co. (Delaware) in connection with the reorganization of Postal Telegraph and Cable Corporation and The Associated Companies.
7/ Beginning with the year 1940, the figures shown are before deduction of income taxes.
8/ Includes $3,600,000, $300,000, and $400,000 charged during the years 1933, 1934, and 1935 respectively, to surplus arising from reduction of capital stock.
9/ Includes $150,000 and $246,420 charged to capital surplus during the years 1940 and 1944, respectively.
10/ Includes data estimated by reporting carriers.
11/ Includes estimated data for the years 1926 to 1933, inclusive.
12/ Represents total compensation for the year divided by the number of employees.
13/ Represents the number of employees at end of October.

Note.--Messages are principally estimated by reporting carriers on basis of actual count for test periods. The number of words in connection with "Domestic service classification" messages are not required to be reported.

1/ Includes international messages (primarily Canadian and Mexican) transmitted in accordance with carriers' rules governing domestic traffic.

2/ Data not available.

3/ About 509,000 marine messages were handled during the year, with related revenue of approximately $288,000, which are included in data reported above for Public, U. S. Government and Press messages.

4/ Includes 9,851,556 messages representing the domestic haul on cable and radio messages. These messages are also included in tables 32 and 33 as foreign and marine.

5/ Excludes the number of domestic haul messages which were not reported.

6/ Includes revenue from domestic haul messages amounting to $289,515 for which the number of messages was not reported. This amount was deducted from the total revenue before computing the average per message.

7/ Number of tickers: 5,164.

( ) Deficit or other reverse item.

1/ Includes insular messages. International messages (primarily Canadian and Mexican) transmitted in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification" in table.

2/ The full-rate ordinary classification average per work is low compared with that for deferred rates because of the inclusion of a large volume of low rate traffic handled wholly within certain Latin American countries for which there are no comparable deferred rates.

3/ Data not available.

4/ Includes $140,043 revenue for which the number of messages is not available. This amount was deducted from the total revenue before computing the average per-word and average per message.

Note.--Represents data as reported by carriers and includes estimates in some instances.

1/ International messages (primarily Canadian and Mexican) transmitted in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification." Insular messages are included under "Foreign service classification."

2/ Reported in minutes: 1,721,474.

3/ See total; not further classified.

4/ Includes revenue amounting to $10,859 for which the number of words and messages was not reported. This amount was deducted before computing the average revenue per word and average revenue per message.

Note.--Data shown in this table do not reflect certain contractual retroactive wage increases incident chiefly to job classification for employees in AFL bargaining units, arising from a directive of the National War Labor Board and recommendation of a Fact Finding Board. Most of such increases under the N.W.L.B. award became effective in November 1947; those incident to recommendation of Fact Finding Board will become effective upon completion of negotiations between the Union and the Company.

Source: Based on wire-telegraph transmission revenues reported monthly by Western Union and Postal Telegraph Companies to Interestate Commerce Commission and Federal Communications Commission. The daily average revenue was calculated monthly by dividing actual revenues by "number of business days" (which excludes Sundays, holidays and one-half of the Saturdays). The centered 12-month moving average of this daily average was calculated for each month from July 1929 through November 1945, and the ratios of the daily average to the moving average were calculated. The median of the ratios for a given month in all years was taken as the seasonal factor for that month, and the daily averages were seasonally adjusted by dividing them by these seasonal factors.

Note.--Principal telegraph, cable, and radiotelegraph carriers included herein are those having annual operating revenues exceeding $50,000. Intercompany duplications have not been excluded.
( ) Deficit or other reverse items.

1/ Balance sheet figures with the exception of the plant and related reserves, are not segregated between the wire-telegraph and ocean-cable systems.
2/ No segregation of surplus between the wire-telegraph and ocean-cable systems of Western Union is reported so that the surplus in the column headed "Wire-telegraph--Western Union Telegraph Co." represents the combined surplus. As a result the total liability side of the balance sheets for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, is $16,756,981 less than the total asset side, the amount of the Western Union ocean-cable system net plant. Accordingly the same amount is included in the total liability side but excluded from the total asset side of the balance sheet for the Western Union Union wire-telegraph system. The net loss of the ocean-cable cable system of $493,858 has been deducted from the net income of the wire-telegraph system of $905,970 to determine the balance sheet item of unappropriated surplus at the end of the year amounting to $46,399,265.

The net income transferred to earned surplus for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, includes the $493,858 net loss of the Western Union ocean-cable system, but it is not included in the unappropriated surplus at end of the year.
3/ Includes estimated retroactive wage accruals amounting to $20,342,761.
4/ Includes principally liability for tax collections and unpaid money orders.
5/ Includes capital stock subscribed - unissued, amounting to $182,500.
6/ Operating revenues and operating expenses are both overstated by intrasystem rents paid between the land-line and ocean-cable systems of the Western Union amounting to $399,324.
7/ Includes $14,844 revenue from marine messages not further classified.
8/ Includes message revenue adjustments amounting to $205,853.
9/ Represents nautical miles.
10/ Includes 24,232 nautical miles.
11/ Includes 413 nautical miles.

SECTION B

Financial and Operating Data Relative to Standard Broadcast Stations and Networks

STANDARD BROADCAST STATIONS AND NETWORKS

Section B contains financial and employee data concerning the operations of 1464 standard (AM) broadcast stations, 4 nation-wide networks and 3 regional networks during the calendar year 1947.

The following table indicates the number of existing licenses for stations and permits for new construction as of December 31, 1947.

Commercial broadcast stations included in summaries -------	1464
Noncommercial station (not included in summaries) -------1/	35
Reports filed too late to be included in summaries --------	21
Construction permits for new stations (not included in summaries) ----------	442
Total ----------	1962

Geographical groupings. -- The standard broadcast stations, which are included in the tabulations, have been grouped geographically into seven regions, as follows:

Northeastern region. -- Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Great Lakes region. -- Illinois, Indiana, Kentucky, Michigan, Ohio, West Virginia, and Wisconsin.

Midwest region. -- Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

Southeastern region. -- Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

South Central region. -- Oklahoma and Texas.

Mountain region. -- Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific region. -- California, Oregon, and Washington.

Note: It should be noted that several AM licensees received authorization during 1947 to construct frequency modulation (FM) stations. Since segregations between FM costs and AM costs were not made, the investment data for the year 1947 necessarily reflect such additional FM costs. Other financial data (such as revenues, expenses, etc.) reflect FM operations to a lesser degree.

1/ Includes 22 stations operated by educational institutions, 11 by religious groups, and 2 by other nonprofit organizations.

1/ Since the purchase of station WXYZ by the American Broadcasting Company, the Michigan Radio Network is not considered as a separate unit from station WXYZ therefore the network operations are included in WXYZ.

2/ Includes some nation-wide, regional and other network time sales reported by licensees of stations with total time sales of less than $25,000.

3/ Since stations with total time sales of less than $25,000 for the year are not required to report details, this figure may include some amounts for national and regional non-network business.

4/ Of these amounts $19,566,148 for 1946 and $19,718,919 for 1947 is applicable to the sale of network time, columns 3 and 4, line 6, while the remainder and amounts shown in columns 9, 10, 15 and 16, line 14, are applicable to amounts reported on line 12, in respective columns.

Note: Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.

1/ Does not include the operations of 11 key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Includes one station clear channel 5 kw. to 20 kw., part-time.

3/ Includes one station not serving as an outlet for nation-wide networks.

4/ Includes one station serving as an outlet for nation-wide networks.

1/ Does not include the operations of 10 key stations of nation-wide networks as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Does not agree with region totals shown in state and region table as some of the metropolitan districts overlap two or more regions.

1/ Does not include the operations of eleven key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregation of expenses between station and network operations.

2/ Does not agree with region totals shown in State and region table as some of the metropolitan districts overlap two or more regions.

1/ Does not include the operations of the key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Since licensees with total time sales of less than $25,000 for the year were not required to report details, this item may include some amounts for network, and national and regional non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.

Note:--Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.

1/ Does not include the property of 11 key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregation of property between station and network operations.

2/ The licensee of one station reported no owned broadcast property.

INTRODUCTION

The financial and operating data shown in this volume are compiled principally from annual reports filed with the Federal Communications Commission for the year 1948. Section A shows data obtained from reports of telephone, wire-telegraph, ocean-cable and radiotelegraph carriers, as well as reports from companies controlling these carriers. Section B of this publication contains data compiled from the annual reports received from broadcast stations and networks.

The yearbook, "Statistics of the Communications Industry in the United States", has been published for ten consecutive years commencing with the year 1939. Some of the tables prior to that date appeared in the Commission's Annual Reports to Congress, and some were released in mimeographed form.

Explanatory remarks pertaining to the coverage of the statistical data are included in the comments introducing Sections A and B.

SECTION A

Financial and Operating Data Relative to Telephone, Wire-Telegraph, Ocean-Cable, and Radiotelegraph Carriers and Controlling Companies

General remarks.--Only those common carriers engaged in interstate, or foreign, communication service are subject to the full jurisdiction of the Commission, and required to file annual and monthly reports with the Commission under the provisions of the Communications Act of 1934, as amended. Virtually all carriers rendering wire-telegraph, ocean-cable, or radiotelegraph service are subject to the full jurisdiction of the Commission. A large number of telephone carriers engaged primarily in intrastate service are not fully subject to the Communications Act of 1934, and are not required to file reports. Notwithstanding, a few of the intrastate telephone carriers file annual reports, and a considerable number file monthly reports for statistical purposes. It is believed that the telephone tabulations presented in Section A include telephone carriers receiving over 90 percent of the operating revenues of the industry.

Financial data from annual reports.--This publication shows items of outstanding interest compiled from annual reports in summary form, and by individual companies. Details of financial and operating data are shown for telephone carriers whose average annual operating revenues exceeded $100,000 for the most recent 3-year period, and for wire-telegraph, ocean-cable and radiotelegraph carriers with average annual operating revenues exceeding $50,000. Owing to the importance and scope of the telephone business handled by the Bell System, statistical data are given separately for that group of companies. Major intercompany duplications of financial data for the Bell System have been eliminated. In view of the fact that the reports filed by the smaller carriers contain less comprehensive information, only a limited amount of data are shown for that group in this volume.

Financial data from monthly reports.--Summary statistical data compiled from the monthly reports filed by common carriers are contained in this publication. Telephone carriers having annual operating revenues exceeding $250,000, and wire-telegraph, ocean-cable and radiotelegraph carriers having annual operating revenues exceeding $50,000 are required to file re-

ports with the Commission. Inasmuch as a large number of intrastate telephone carriers file on a monthly, but not on an annual basis, the cumulative monthly figures for telephone carriers are slightly higher than the figures shown for carriers, which only file annual reports.

Controlling companies.--The intercorporate relations among common carriers offering communication service, and the controlling companies, are shown in a table in this volume, together with financial data concerning individual holding companies. The annual reports filed by controlling companies are classified into two groups, as follows: (a) Companies whose interest in common carriers constitutes a major portion of their assets, and (b) companies whose interest in common carriers constitutes only a nominal portion of their assets.

Source: Annual reports filed with the Interstate Commerce Commission through 1933 and with the Federal Communications Commission beginning with 1934. In a few instances data from unofficial sources or estimates were used.
Note.--The difference in the number of carriers reporting to the Commission in 1948 in comparison with prior years is caused by mergers, consolidations, reclassifications, etc.

Data for 1926-1943 include information for carriers reporting as class A in 1943. These data also cover properties acquired previous to 1943 by such carriers, insofar as data concerning such properties are available from annual reports. Carriers which reported as class A carriers for the years 1944-1948 but not in 1943 are reflected in the data for 1944-1948 only. Neither information for these companies nor for properties acquired by them previous to 1944 are included in the data for the years 1926-1943.

The effect of this change of definition is extremely slight. For example, the operating revenues of class A carriers reporting in 1948 not so characterized in 1943 were only 0.117 percent of total operating revenues reported.

1/ For amounts reflecting eliminations of intercompany duplications see table 7B.
2/ In comparing data in this table, consideration may be given to the minor effect of the revisions of the Uniform System of Accounts, effective January 1, 1933 and January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statement.
3/ The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on only the respondent's portion of jointly owned wire was included.
4/ Partly estimated.
5/ Data shown for years 1926-1932 include estimates
6/ Represents total compensation for the year divided by the number of employees.
7/ Represents the number of employees at end of October.
8/ Profits or losses on intercompany transfers of plant have not been eliminated.

Note: - Gross operating revenues and expenses are used in computing averages. They have been computed on the basis of 325 days to the year, which is the basis used by the Bureau of the Census in similar computations.

1/ Excludes figures for American Telephone & Telegraph Co. inasmuch as its operations are not confined to one geographical region, but are included in totals for the United States.

2/ American Telephone & Telegraph Co. handles long line service only; has no exchange central offices.

Source: Based on monthly reports of carriers to Interstate Commerce Commission and Federal Communications Commission. The centered 12 - month moving average was calculated monthly from July 1929 through September 1946, and the ratios of the toll service revenues to the moving average were calculated. The ratios for a given month in all years were graduated by means of a linear relation with time. Certain specific months were omitted in determining the relations because of unusual historic events, e.g. October 1929 (market crash), September 1939 (invasion of Poland), and the like. The seasonal factors applied are the graduated values. The monthly revenues were seasonally adjusted by dividing them by these seasonal factors.

1/ The intercompany duplications with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported aggregate par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of the combined surplus accounts of the carriers.

2/ "Bell System" represents the American Telephone and Telegraph Co. and its principal telephone subsidiaries.

3/ To apply all rent revenues, approximately two-thirds of which are intercompany, against rent expenses, to show net rent expenses in first two columns of figures.

4/ Averages for all companies combined not computed.

5/ Partly estimated.

6/ Includes land-line charges. With respect to mobile service, monthly charges, and installation and move charges are included.

( ) Deficit or other reverse item.

1/ Includes carriers consolidated or merged for which annual report data are available. Intercompany duplications have not been excluded.

2/ Reflects transfer of $38,000,000 to depreciation reserve from surplus by Western Union Telegraph Co.

3/ In comparing data in this table with returns for prior years, consideration should be given to changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1943.

4/ Includes net book cost of plant of Postal Telegraph, Inc. acquired by the Western Union Telegraph Co. in the amount of $16,754,143 on basis of gross book cost of $69,320,179 less tentative allowances for depreciation of $52,566,036.

5/ Not comparable with amounts reported for December 31, 1943 because of accounting adjustments for Postal Telegraph plant purchased by the Western Union Telegraph Co. October 7, 1943; comparable 1943 amounts are $477,431,438 and $221,701,458, for plant and depreciation allowance, respectively.

6/ Includes other long-term debt.

7/ Includes capital surplus.

8/ Represents operating income before deduction of income taxes.

9/ Includes $3,535,926 charged to capital surplus.

10/ Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual count for test periods.

11/ Data shown for years 1926 to 1933, inclusive, include estimates by reporting carriers. The average shown represents total compensation for the year divided by the number of employees.

12/ Represents the number of employees at end of October.

Source: Annual reports, correspondence, and other reports. Intercompany duplications, if any, have not been excluded.

( ) Deficit or other reverse item.
1/ Data not available.
2/ In comparing data in this table, consideration should be given to the effect of changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1940.
3/ Includes other long-term debt beginning with the year 1940.
4/ Includes capital stock subscribed--unissued, amounting to $282,500, $182,500, and $75,000 for the years 1946, 1947, and 1948 respectively.
5/ Includes capital surplus beginning with the year 1940.
6/ The increase was due principally to adjustments made by Mackay Radio and Telegraph Co. (California) and Mackay Radio and Telegraph Co. (Delaware) in connection with the reorganization of Postal Telegraph and Cable Corporation and The Associated Companies.
7/ Beginning with the year 1940, the figures shown are before deduction of income taxes.
8/ Includes $3,600,000, $300,000, and $400,000 charged during the years 1933, 1934, and 1935 respectively, to surplus arising from reduction of capital stock.
9/ Includes $150,000 and $246,420 charged to capital surplus during the years 1940 and 1944, respectively.
10/ Includes data estimated by reporting carriers.
11/ Includes estimated data for the years 1926 to 1933, inclusive.
12/ Represents total compensation for the year divided by the number of employees.
13/ Represents the number of employees at end of October.

d/ Deficit or other reverse item.

1/ Includes certain corrections not appearing in figures shown in the monthly releases.

2/ Includes extraordinary income charges made during April 1945 amounting to $1,206,039, resulting from an adverse decision of the Supreme Court with respect to The Western Union Telegraph Company's liability for the income taxes of two lessor companies, Gold and Stock Telegraph Co. and International Ocean Telegraph Co.

3/ Includes extraordinary adjustments made in December 1947, applicable to prior years of reserves for depreciation and uncollectible receivables (in the net amount of $8,729,234). Apart from these adjustments the net income for the year 1947 amounted to $9,141,346.

4/ Includes income from sale of land and building of Western Union Telegraph Co., 60 Hudson Street, New York, N. Y., during March 1948.

5/ Western Union Telegraph Co. accumulated as a deferred debit item during 1948, $2,399,638 representing training costs incident to its modernization and improvement program. This item was charged to operating expenses in December 1948.

Source: Based on wire-telegraph transmission revenues reported monthly by Western Union and Postal Telegraph Companies to Interstate Commerce Commission and Federal Communications Commission. (Table 39-A) For the adjusted index, the average daily revenue was calcualted monthly by dividing actual revenues by "number of business days". The "number of business days" in a month were computed by using the following weights: Monday through Friday, 100%; Saturdays, 50%; Sundays, 25%; holidays -- January 1, 50% February 22, 50%; May 30, 25%; July 4, 25%; Labor Day, 25%; November 11, 50%; Thanksgiving, 50%; and December 25, 50%. If a holiday fell on Sunday, the following Monday was given the holiday weight. If a holiday fell on Saturday, the smaller percentage weight was used. The centered 12-month moving average of this daily average was calcualted for each month from July 1929 through December 1948, and the ratios of the daily average to the moving average were calculated. The median of the ratios for a given month in all years was taken as the seasonal factor for that month, and the daily averages were seasonally adjusted by dividing them by these seasonal factors. The adjusted average daily revenues were expressed as percentages of their 1935-1939 average. (Table 39-B) The unadjusted indexes express transmission revenues as a percentage of their 1935-1939 average.

Note.--Principal telegraph, cable, and radiotelegraph carriers included herein are those having annual operating revenues exceeding $50,000. Intercompany duplications have not been excluded.

( ) Deficit or other reverse items.

1/ Balance sheet figures with the exception of the plant and related reserves, are not segregated between the wire-telegraph and ocean-cable systems.

2/ No segregation of surplus between the wire-telegraph and ocean-cable systems of Western Union is reported so that the surplus in the column headed "Wire-telegraph--Western Union Telegraph Co." represents the combined surplus. As a result the total liability side of the balance sheets for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, is $16,384,227 less than the total asset side, the amount of the Western Union ocean-cable system net plant. Accordingly the same amount is included in the total liability side but excluded from the total asset side of the balance sheet for the Western Union wire-telegraph system. The net income of the ocean-cable system of $356,460 has been added to the net income of the wire-telegraph system of $1,264,578 to determine the balance sheet item of unappropriated surplus at the end of the year amounting to $46,941,876.

The net income transferred to earned surplus for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, includes the $356,460 net income of the Western Union ocean-cable system, but it is not included in the unappropriated surplus at the end of the year.

3/ Includes estimated retroactive wage accruals amounting to $4,911,725.

4/ Includes principally liability for tax collections and unpaid money orders.

5/ Includes capital stock subscribed - unissued, amounting to $75,000.

6/ Operating revenues and operating expenses are both overstated by intrasystem rents paid between the land-line and ocean-cable systems of Western Union amounting to $436,573.

7/ Represents rectifications, adjustments, etc.

8/ Includes message revenue adjustments amounting to $64,512 (reverse item).

9/ Includes message revenue adjustments amounting to $52,492 (reverse item).

10/ Represents nautical miles.

11/ Includes 24,264 nautical miles.

12/ Estimated on the basis of returns for the month of December, 1948.

13/ Includes territories and possessions of the United States except the Canal Zone.

14/ Represents principally data estimated by wire-telegraph and ocean-cable carriers on basis of actual count for test periods, and partially estimated by radiotelegraph carriers.

15/ International messages (primarily Canadian and Mexican) handled in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification." Insular messages are included under "Foreign service classification."

16/ Includes domestic service classification - foreign traffic.

17/ Represents domestic service classification - foreign traffic.

18/ Message data already included under applicable service classification, and accordingly omitted from message totals to avoid duplication.

19/ Domestic haul of marine messages is included under "Domestic service classification."

20/ Data not available.

21/ Word data for "Domestic service classification" and "Domestic haul" are not available for wire-telegraph and ocean-cable carriers.

22/ Includes $122,626 revenue for which the words and messages are not reported.

INTRODUCTION

This section contains financial data concerning the operation of broadcast networks and AM, FM, and TV stations during the calendar year 1948. Financial data for the FM and TV broadcast services are included this year for the first time.

Part I, which deals with commercial AM broadcast stations and networks, covers the operations of 4 nation-wide networks, 3 regional networks and 1,824 AM broadcast stations. As of December 31, 1948, a total of 1,877 commercial AM stations were on the air.1/ An additional 215 AM stations were authorized and in the process of construction. AM licensees also operating FM stations were permitted to file "joint reports" covering the consolidated operation of both stations when separate accounts for each station were not maintained. For this reason, the financial statistics pertaining to AM stations and networks include data with respect to 440 FM stations operated by AM licensees. In virtually all such cases, the two stations were jointly-operated by the licensee, i.e., programs broadcast over the AM station were duplicated simultaneously by the FM station at no additional cost to the advertiser.

Part II summarizes the operation of (a) 142 FM stations (operated by AM licensees) for which separate FM reports were filed and (b) 89 FM stations operated by non-AM licensees.

Part III summarizes the operations of 4 TV networks and 50 TV stations for the year 1948.

1/ In addition, 35 AM stations operated non-commercially. Of these, 22 were licensed to educational institutions, 11 to religious groups and 2 to other non-profit organizations.

1/ Since the reports filed by the network key stations (i.e., stations originating most of the network's programs) do not contain adequate segregations of expenses between station and network operations, financial data for networks and their key stations have been combined.

2/ Includes some nation-wide, regional and other network time sales reported by licensees of stations with total time sales of less than $25,000.

3/ Since stations with time sales of less than $25,000 for the year are not required to report details, this figure may include some amounts for national and regional non-network business.

4/ Of these amounts $19,718,919 for 1947 and $20,677,156 for 1948 is applicable to the sale of network time, columns 3 and 4, line 6, while the remainder and amounts shown in columns 9, 10, 15 and 16, line 14, are applicable to amounts reported on line 12, in respective columns.

Note:--Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.

1/ Does not include the operations of 11 key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Includes one station clear channel 5 kw. to 25 kw., part-time.

3/ Includes two stations not serving as an outlet for nation-wide networks.

4/ Includes one station not serving as an outlet for nation-wide networks.

1/ Does not include the operations of 11 key stations of nation-wide networks as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Does not agree with region totals shown in state and region table as some of the metropolitan districts overlap two or more regions.

1/ Does not include the operations of eleven key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregation of expenses between station and network operations.

2/ Does not agree with region totals shown in State and Region table as some of the metropolitan districts overlap two or more regions.

1/ Since licensees with total time sales of less than $25,000 for the year were not required to report details, this item may include some amounts for network and national and regional non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.
2/ Includes the operations of nine key stations.
3/ Includes the operations of ten key stations.
4/ Includes the operations of eleven key stations.

1/ Does not include the operations of the key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Since licensees with total time sales of less than $25,000 for the year were not required to report details, this item may include some amounts for network, and national and regional non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.

1/ Does not include the property of 11 key stations of nation-wide networks, as the reports filed by them do not include adequate segregation of property between station and network operations.
2/ Includes data of one part-time station.
3/ The licensee of one station reported no owned broadcast property.

Note: Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.

TELEVISION FINANCIAL DATA

During 1948, the four TV networks and 50 stations (total on the air during the year) reported aggregate revenues of $8.7 million, aggregate expenses of $23.6 million and losses of almost $15 million. All networks and stations reported a loss from operations during the year.

Of the $8.7 million industry revenues, approximately $2.5 million were derived from network programs with the remaining $6.2 million sold directly by stations.

The distribution of total revenues, expenses and losses as between networks and stations was as follows:

	Revenues (millions)	Expenses (millions)	Loss (millions)
4 networks (including 10 owned and operated stations)	$4.8	$11.2	$ 6.4
40 other stations	3.9	12.4	8.5
Industry Total	$8.7	$23.6	$14.9

Exactly half of the stations operated six months or less with only 17 in operation during the entire year. Average monthly station revenues ranged from $20,000 in the case of the "full year" stations to $5,000 for stations in operation only two months or less.

With respect to operating costs of TV stations, the following data are based on 14 of the 17 stations in operation during the whole of 1948:

Aggregate Annual Operating Costs of 14 stations	$7,532,000
Average per station	538,000
Average per month per station	45,000
Highest Annual Operating Expense	814,000
Lowest Annual Operating Expense	59,000 1/

1/ The wide range in annual operating costs reported during 1948 is accounted for, in large measure, by differences in the number of hours of station operation per week.

In several of the large cities, TV station revenues during 1948 constituted a relatively high proportion of the total revenues reported by all stations (both aural and visual) in those cities. In Philadelphia, TV revenues reported by 3 stations were almost 10 percent of the combined revenues of all broadcasting stations in that city. In New York and Washington, D. C., the proportion going to TV was approximately 8 percent, while in Baltimore and Milwaukee TV accounted for approximately 7 percent of the total revenues of all stations.

FM FINANCIAL DATA

Of the 700 commercial FM stations on the air as of December 31, 1948, 593 (or 85 percent) were authorized to licensees of standard broadcast (AM) stations and 107 (or 15 percent) to persons having no AM broadcast interests.

Financial reports filed by FM licensees for the year 1948 indicated that in the majority of cases where FM stations were authorized to AM licensees, the two stations were "jointly operated", i.e., programs broadcast over the AM stations were duplicated simultaneously by the FM station at no additional cost to the advertiser.

Thus, of the 593 AM licensees operating FM stations, only 77 reported separate revenues from their FM operation during 1948. A summary of the financial information reported for these 77 stations is as follows:

	Aggregate	Average per Station
Total broadcast revenues	$621,469	$8,070
Total broadcast expenses	2,153,659	27,970
Total broadcast loss	$1,532,190	$19,900

Of the 77 FM stations, 54 had been in operation for the full year of 1948. Total revenues of the full-year group averaged $9,300 per station and average expenses about $33,600. Thus, the average loss for stations operating the full 12 months was slightly over $24,000. Of the 77 stations, four reported an income from FM operation during 1948.

Estimated FM station expense data were submitted by 65 of the 516 FM licensees who apparently engaged in a joint AM-FM operation during 1948. These reports indicated that FM station costs in an AM-FM joint operation averaged about $15,000 during 1948.

The following table summarizes the 1948 financial information reported for 89 of the 107 FM stations operated by persons having no AM broadcast interests:

	Aggregate	Average per Station
Total broadcast revenues	$1,126,208	$12,650
Total broadcast expenses	4,182,558	46,990
Total broadcast loss	$3,056,350	$34,340

Of the 89 FM stations, 52 had been in operation for the full year of 1948. Total revenues of the full-year group averaged $19,000, expenses $53,300 with an average loss of $34,300. All but three of the 89 reporting stations showed a loss from operations during 1948.

INTRODUCTION

This volume contains financial and operating data compiled chiefly from annual reports filed with the Federal Communications Commission for the year 1949. Section A includes information obtained from reports of telephone, wire-telegraph, ocean-cable and radio-telegraph carriers, as well as controlling companies. Section B contains data shown in the annual reports filed by broadcast stations and networks.

Beginning with the year 1939, this publication has been issued successively for eleven years. Prior to that date, some of the tables were released in mimeographed form and some were shown in the Commission's Annual Reports to Congress.

Some additional explanatory remarks about the coverage of the statistical data are contained in the statements introducing Sections A and B.

SECTION A

Financial and Operating Data Relative to Telephone, Wire-Telegraph, Ocean-Cable, and Radiotelegraph Carriers and Controlling Companies

COMMON CARRIERS AND CONTROLLING COMPANIES

General comments.--In accordance with the provisions of the Communications Act of 1934, as amended, only common carriers engaged in interstate, or foreign, communication service, are subject to the full jurisdiction of the Commission, and are required to file annual and monthly reports. Practically all wire-telegraph, ocean-cable and radiotelegraph carriers are subject to the full jurisdiction of the Commission. There is a large number of telephone carriers engaged in intrastate service, which are not fully subject to the Act and are not required to file reports. Some of the larger intrastate carriers, however, file annual reports, and a considerable number file monthly reports for statistical purposes. The gross operating revenues of the telephone carriers reporting annually cover over 90 percent of the revenues of all telephone carriers in the United States.

Common-carrier annual reports.--All items in the annual reports of general interest are shown in this publication in summary form, and by individual companies. Financial and operating data in detail are shown for telephone carriers whose average annual operating revenues for the past 3-year period exceeded $100,000, and for wire-telegraph, ocean-cable and radiotelegraph carriers with average annual operating revenues exceeding $50,000. In view of the fact that the major portion of the telephone business is handled by the Bell System, figures are given separately for that group of companies. The principal company duplications of financial data among the Bell System companies have been eliminated. As the reports from the smaller carriers contain less comprehensive information, only a limited amount of data are shown for that group of carriers.

Common carrier monthly reports.--This volume contains summaries of statistical data compiled from monthly reports filed by common carriers having average operating revenues exceeding $250,000. The number of telephone carriers used in the tabulations was reduced, beginning with January 1948, from 100-120 to 53 carriers. The telephone companies ommitted include approximately 60 carriers, that have filed reports on a voluntary basis, as they are subject only to Sections

201-205 of the Act. However, the deletion of the aforementioned companies from the monthly summaries reduce the statistical coverage by less than 3 percent based on the annual operating revenues received by those carriers.

Reports from controlling companies.--Financial data pertaining to individual companies controlling common carriers reporting to the Commission are contained in this publication, also a table showing the intercorporate relations between the common carriers and controlling companies. The annual reports filed by holding companies are classified into the following groups: (a) Companies with interests in common carriers, which constitute a major portion of their assets, and (b) Companies with interests in common carriers, which constitute only a nominal portion of their assets.

Source: Annual reports filed with the Interstate Commerce Commission through 1933 and with the Federal Communications Commission beginning with 1934. In a few instances data from unofficial sources or estimates were used.

Note.--The difference in the number of carriers reporting to the Commission in 1949 in comparison with prior years is caused by mergers, consolidations, reclassifications, etc.

Data for 1926-1943 include information for carriers reporting as class A in 1943. These data also cover properties acquired previous to 1943 by such carriers, insofar as data concerning such properties are available from annual reports. Carriers which reported as class A carriers for the years 1944-1949 but not in 1943 are reflected in the data for 1944-1949 only. Neither information for these companies nor for properties acquired by them previous to 1944 are included in the data for the years 1926-1943.

The effect of this change of definition is extremely slight. For example, the operating revenues of class A carriers reporting in 1949 not so characterized in 1943 were only 0.117 percent of total operating revenues reported.

[1]For amounts reflecting eliminations of intercompany duplications see table 7B.

[2]In comparing data in this table, consideration may be given to the minor effect of the revisions of the Uniform System of Accounts, effective January 1, 1933 and January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statement.

[3]The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on only the respondent's portion of jointly owned wire was included.

[4]Partly estimated.

[5]Data shown for years 1926-1932 include estimates.

[6]Represents total compensation for the year divided by the number of employees.

[7]Represents the number of employees at end of October.

[8]Profits or losses on intercompany transfers of plant have not been eliminated.

NOTE:- Gross operating revenues and expenses are used in computing averages. They have been computed on the basis of 325 days to the year, which is the basis used by the Bureau of the Census in similar computations. Refer to explanatory remarks on page IX relative to the exclusion of telephone carriers, subject only to sections 201-5 of the Act.

1 Average number of telephones, are shown as reported in the annual reports to the Commission.

2 Excludes figures for American Telephone & Telegraph Co. inasmuch as its operations are not confined to one geographical region, but are included in totals for the United States.

3 American Telephone & Telegraph Co. handles long line service only; has no exchange central offices.

[1]The intercompany duplications with respect to securities, receivables, payables, and items of income and expenses, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owing such securities and the reported aggregate par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of the combined surplus accounts of the carriers.

[2]"Bell System" represents the American Telephone and Telegraph Co. and its principal telephone subsidiaries.

[3]Averages for all companies combined not computed.

[4]Partly estimated.

[5]Includes land-line charges. With respect to mobile service, monthly charges, and installation and move charges are included

()Deficit or other reverse item.

[1]Includes carriers consolidated or merged for which annual report data are available. Intercompany duplications have not been excluded.

[2]Reflects transfer of $38,000,000 to depreciation reserve from surplus by Western Union Telegraph Co.

[3]In comparing data in this table with returns for prior years, consideration should be given to changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1943.

[4]Includes net book cost of plant of Postal Telegraph, Inc. acquired by the Western Union Telegraph Co. in the amount of $16,754,143 on basis of gross book cost of $69,320,179 less tentative allowances for depreciation of $52,566,036.

[5]Not comparable with amounts reported for December 31, 1943 because of accounting adjustments for Postal Telegraph plant purchased by the Western Union Telegraph Co. October 7, 1943; comparable 1943 amounts are $477,431,438 and $221,701,458, for plant and depreciation allowance, respectively.

[6]Includes other long-term debt.

[7]Includes capital surplus.

[8]Represents operating income before deduction of income taxes.

[9]Includes $3,535,926 charged to capital surplus.

[10]Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual count for test periods.

[11]Data shown for years 1926 to 1933, inclusive, include estimates by reporting carriers. The average shown represents total compensation for the year divided by the number of employees.

[12]Represents the number of employees at end of October.

[1]Data not available.

[2]In comparing data in this table, consideration should be given to the effect of changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1940.

[3]Includes other long-term debt beginning with the year 1940.

[4]Includes capital stock subscribed--unissued, amounting to $282,500, $182,500, and $75,000 for the years 1946, 1947, and 1948, respectively.

[5]Includes capital surplus beginning with the year 1940.

[6]The increase was due principally to adjustments made by Mackay Radio and Telegraph Co. (California) and Mackay Radio and Telegraph Co. (Delaware) in connection with the reorganization of Postal Telegraph and Cable Corporation and The Associated Companies.

[7]Beginning with the year 1940, the figures shown are before deduction of income taxes.

[8]Includes $3,600,000, $300,000, and $400,000 charged during the years 1933, 1934, and 1935 respectively, to surplus arising from reduction of capital stock.

[9]Includes $150,000 and $246,420 charged to capital surplus during the years 1940 and 1944, respectively.

[10]Includes data estimated by reporting carriers.

[11]Includes estimated data for the years 1926 to 1933, inclusive.

[12]Represents total compensation for the year divided by the number of employees.

[13]Represents the number of employees at end of October.

Table 30.--Message and other transmission revenues of principal wire-telegraph, ocean-cable and radiotelegraph carriers shown according to class of message and other transmission service--continued

(Year ended Dec. 31, 1949)

Note.--The data in this table are as reported by the carriers and include some estimates.

( ) Reverse item.

[1] Includes cable system of Western Union Telegraph Co.

[2] Includes international messages (primarily Canadian and Mexican) transmitted in accordance with carriers' rules governing domestic traffic.

[3] About 469,000 marine messages handled during the year, with related revenue of approximately $276,000, are included in data shown for domestic messages and exclude from data shown for domestic haul.

[4] Includes foreign and insular messages.

[5] Data not available.

[6] Excludes an unknown number of messages, the revenue from which amounted to $12,254.

Source: Based on wire-telegraph transmission revenues reported monthly by Western Union and Postal Telegraph Companies to Interstate Commerce Commission and Federal Communications Commission. (Table 38-A) For the adjusted index, the average daily revenue was calculated monthly by dividing actual revenues by "number of business days". The "number of business days" in a month were computed by using the following weights: Monday through Friday, 100%; Saturdays, 50%; Sundays, 25%; holidays -- January 1, 50%; February 22, 50%; May 30, 25%; July 4, 25%; Labor Day, 25%; November 11, 50%; Thanksgiving, 50%; and December 25, 50%. If a holiday fell on Sunday, the following Monday was given the holiday weight. If a holiday fell on Saturday, the smaller percentage weight was used. The centered 12-month moving average of this daily average was calculated for each month from July 1929 through December 1948, and the ratios of the daily average to the moving average were calculated. The median of the ratios for a given month in all years was taken as the seasonal factor for that month, and the daily averages were seasonally adjusted by dividing them by these seasonal factors. The adjusted average daily revenues were expressed as percentages of their 1935-1939 average. (Table 38-B) The unadjusted indexes express transmission revenues as a percentage of their 1935-1939 average.

Table 46.--Statistics of principal wire-telegraph, ocean-cable, and radiotelegraph carriers reporting annually to the Commission as at December 31, 1949 and for years then ended--Continued

Note.--Principal telegraph, cable, and radiotelegraph carriers included herein are those having annual operating revenues exceeding $50,000. Intercompany duplications have not been excluded.

( ) Deficit or other reverse items.

[1] Balance sheet figures with the exception of the plant and related reserves, are not segregated between the wire-telegraph and ocean-cable systems.

[2] Company ceased operations on June 15, 1949 and will dissolve.

[3] No segregation of surplus between the wire-telegraph and ocean-cable systems of Western Union is reported so that the surplus in the column headed "Wire-telegraph--Western Union Telegraph Co." represents the combined surplus. As a result the total liability side of the balance sheets for ocean-cable, and for ocean-cable and radiotelegraph carriers combined is $15,925,337 less than the total asset side, the amount of the Western Union ocean-cable system net plant. Accordingly the same amount is included in the total liability side but excluded from the total asset side of the balance sheet for the Western Union wire-telegraph system. The net income of the ocean-cable system of $969,768 has been added to the net income of the wire-telegraph system of ($3,468,249) to determine the balance sheet item of unappropriated surplus at the end of the year amounting to $44,443,395. The net income transferred to earned surplus for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, include the $969,768 net income of the Western Union ocean-cable system, but it is not included in the unappropriated surplus at the end of the year.

[4] Includes estimated retroactive wage accruals amounting to $597,000.

[5] Includes principally liability for tax collections and unpaid money orders.

[6] Operating revenues and operating expenses are both overstated by intrasystem rents paid between the land-line and ocean-cable systems of Western Union amounting to $436,573.

[7] Represents adjustments.

[8] Includes 167 nautical miles.

[9] Represents nautical miles.

[10] Includes 23,628 nautical miles.

[11] Includes 24,957 nautical miles.

[12] Estimated on the basis of returns for the month of December, 1949.

[13] Includes territories and possessions of the United States except the Canal Zone.

[14] Represents principally data estimated by wire-telegraph and ocean-cable carriers on basis of actual count for test periods, and partially estimated by radiotelegraph carriers.

[15] International messages (primarily Canadian and Mexican) handled in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification." Insular messages are included under "Foreign service classification."

[16] Includes domestic service classification--foreign traffic.

[17] Represents domestic service classification--foreign traffic.

[18] Message data already included under applicable service classification, and accordingly omitted from message totals to avoid duplication.

[19] Domestic transmission of marine messages is included under "Domestic service classification."

[20] Data not available.

[21] Word data for "Domestic service classification" and "Domestic transmission of foreign and marine messages" are not available for wire-telegraph and ocean-cable carriers.

[22] Includes $89,354 revenue for which the words and messages are not reported.

Table 50.--Intercorporate relations of communication carriers and controlling companies, Dec. 31, 1949

Note.--Carriers controlled by other companies are indicated by indentation from the margin. For the purpose of this table, control is defined as the ownership of more than 50% of a carrier's voting common stock. Exceptions to this definition are noted in the "Remarks" column. Information shown is principally from annual reports filed with the Commission. In some instances data were obtained from unofficial sources.

INTRODUCTION

This section contains data concerning the operation of broadcast networks and AM, FM, and TV stations during the calendar year 1949.

Part I, which deals with commercial AM broadcast stations and networks, covers the operations of 4 nation-wide networks, 3 regional networks and 2026 AM broadcast stations. Of the 2026 stations used in these statistics 2021 reported revenues and expenses, and 2017 stations reported owned broadcast property. As of December 31, 1949, a total of 2065 were on the air.[1] AM licensees also operating FM stations were permitted to file "joint reports" covering the consolidated operation of both stations when separate accounts for each station were not maintained. For this reason, the financial statistics pertaining to AM stations and networks include data with respect to 619 FM stations operated by AM licensees. In virtually all such cases, the two stations were jointly operated by the licensee, i.e., programs broadcast over the AM station were duplicated simultaneously by the FM station at no additional cost to the advertiser.

Part II summarizes the operation of (a) 164 FM stations (operated by AM licensees) for which separate FM reports were filed and (b) 104 FM stations operated by non-AM licensees.

Part III summarizes the operation of 4 TV networks and 85 stations for the year 1949.

---

[1] *In addition, 35 AM stations operated non-commercially. Of these, 22 were licensed to educational institutions, 11 to religious groups and 2 to other non-profit organizations.*

[1]Since the reports filed by the network key stations (i.e., stations originating most of the network programs) do not contain adequate segregations of expenses between station and network operations, financial data for networks and their key stations have been combined.

[2]Includes some nation-wide, regional and other network time sales reported by licensees of stations with total time sales of less than $25,000.

[3]Since stations with time sales of less than $25,000 for the year are not required to report details, this figure may include some amounts for national and regional.

[4]Of these amounts $20,677,156 for 1948 and $19,648,551 for 1949 is applicable to the sale of network time, columns 3 and 4, line 6, while the remainder and amounts shown in columns 9, 10, 15 and 16, line 14, are applicable to amounts reported on line 12, in respective columns.

[1] Does not include the operations of twelve key stations of networks, as the reports filed by them with the Commission do not include adequate segregation of expenses between station and network operations.

[2] Does not agree with region totals shown in state and region table as some of the metropolitan districts overlap two or more regions.

[1] Does not include operations of twelve key stations of networks, as the reports filed by them with the Commission do not include adequate segragations of expenses between station and network operations.

[2] Does not agree with region totals shown in State and Region table as some of the Metropolitan districts overlap two or more regions.

[1]Since licensees with total time sales of less than $25,000 for the year were not required to report details, this item may include some amounts for networks and national and regional non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.
[2]Includes the operations of key stations of networks.

[1] Does not include the operations of the key stations of networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

[2] Since licensees with total time sales of less than $25,000 for the year were not required to report details, this item may include some amounts for network, and national and regior l non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.

Note: Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.
[1] Does not include the property of 12 key stations of networks, as the reports filed by them do not include adequate segregation of property between station and network operations.
[2] Includes data of 1 50 kw., part-time station.
[3] Includes data of 2 50 kw., part-time stations.

FM FINANCIAL DATA

Of the 733 commercial FM stations in operation on December 31, 1949, a total of 619 or 84.4 percent were authorized to licensees of AM broadcast stations operating in the same community and 114 or 15.6 percent were authorized to licensees having no AM broadcast interests.

Financial reports filed by FM licensees for the year 1949 indicated that in the majority of cases where FM stations were authorized to AM licensees in the same community, the two stations were "jointly operated", i.e., programs broadcast over the AM stations were duplicated simultaneously by FM stations.

Thus, of the 619 AM licensees operating FM stations, only 68 reported separate revenues from their FM operations for 1949. A summary of the financial information reported for these stations is as follows:

	Aggregate	Average per station
Total broadcast revenues	$1,019,860	$15,000
Total broadcast expenses	2,355,458	34,640
Total broadcast loss	1,335,598	19,640

Of the 68 FM stations, 41 were in operation for the full years 1948 and 1949. Data for 1948 and 1949 are available for 30 of these 41 stations. Average revenues per station for this group were $13,483 in 1949 as compared with $10,997 in 1948; average expenses were $39,607 as compared with $34,301 in 1948; and average losses were $26,124 as compared with $23,304 in 1948. Of the 68 stations reporting, four reported an income from FM operations during 1949.

An additional 96 AM-FM jointly operated stations submitted reports showing expense data only for their FM operations. These reports indicated that in 1949 FM costs for these stations averaged $19,300.

The following table summarizes the 1949 financial information reported for 104 stations operated by persons having no AM broadcast interests:

	Aggregate	Average per station
Total broadcast revenues	$1,394,167	$13,405
Total broadcast expenses	4,968,475	47,775
Total broadcast loss	3,574,308	34,370

Of the 104 stations reporting for 1949, a total of 35 were in operation for the full years 1948 and 1949. Data for 1948 and 1949 are available for 32 of these stations. Broadcast revenues for these stations averaged $21,178 in 1949 as compared with $17,825 in 1948; average expenses were $58,026 as compared with $50,409 in 1948; and average losses were $36,848 as compared with $32,584 in 1948. None of the 104 stations reported income from operations in 1949.

TELEVISION FINANCIAL DATA

During 1949, the four TV networks and 98 stations (total on the air during the year) reported aggregate revenues of $34.3 million, aggregate expenses of $59.6 million and losses of more than $25 million.

Of the $34.3 million industry revenues, approximately $7.6 million were derived from network programs with the remaining $26.7 million sold directly by stations.

The distribution of total revenues, expenses and losses as between networks and stations was as follows:

	Revenues (millions)	Expenses (millions)	Loss (millions)
4 networks (including 13 owned and operated stations)	$18.9	$30.6	$11.7
85 other stations	15.4	29.0	13.6
Industry total	$34.3	$59.6	$25.3

The proportion of television broadcast revenues to total aural (AM or FM) and video (TV) broadcast revenues in cities served by TV rose from 4.4 percent in 1948 to 10.7 percent in 1949. In several of the large cities, TV station revenues for 1949 constituted a high proportion of the total revenues reported by all stations, both aural and visual. In Baltimore, Philadelphia and Washington, D.C., revenues reported by TV stations were approximately 20 percent of the combined revenues of all stations in those cities. In Los Angeles and New York the proportion going to TV was approximately 17 percent, while in Columbus, Ohio, and Chicago TV accounted for approximately 12 percent of the total revenues of all stations.
